KASIM ABUBKAR JAJERE

FullStack Engineer (React/Laravel)

My name is Kasim Abubakar Jajere I am an Agile Software Engineer looking to advance my tech career. I can and often do work well alone, but I am at my best collaborating with others. I am an innovative thinker and a solution provider. In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancement.

Experience

FLASHNET GLOBAL IT SOLUTIONS LTD | FullStack Engineer   2020 - Date

At Flashnet, I collaborated with a team as a full-stack developer, utilizing React for the frontend and Laravel for the backend, to develop the Zakiru Micro Savings project.

This financial application enabled customer registration, deposits, withdrawals, and money transfers within the application. Working closely with the team, we successfully built the necessary API integrations, implemented the user interface, and ensured smooth functionality.

This experience provided me with valuable insights into application development and strengthened my skills in both frontend and backend technologies.

Skills: React.js, Laravel, Cascading Style Sheets(CSS), HTML, PHP, REST, Git

HYTEK COMPUTER | Software Developer   2019 - 2020

During my time at Hytek Computer, I served as a full-stack developer, utilizing PHP, MySQL, and JavaScript to create complete applications. This involved working on both the front-end and back-end aspects of the projects, ensuring the smooth integration of various functionalities.

Skills: React.js, Laravel, CSS, HTML, JavaScript, PHP, Git
